July, August, September - Usually open Monday to Saturday but **phone to confirm**

ST. NORBERT FARMERS MARKET

May 21 - mid August Saturday 8 am - 3 pm
Located on Pembina Highway, about 1/2 km south of the perimeter.

Dwarf Milkweed
Asclepias ovalifolia

with Monarch Caterpillar

2016

ABOUT OUR PLANTS

Our plants are all grown from seed collected in Manitoba. Seed was initially collected from wild stock but now over 90% is collected from our own stock beds. You get a very high survival rate when transplanting our plants into your garden. This is because the roots are not cut off or disturbed as they are when plants are dug from the wild. They just keep on growing. All the plants are perennials, however, perennials have assorted lifespans. Some fast growing varieties such as Black-Eyed Susan, Gaillardia, and Yellow Coneflower live a few years. These short lived varieties reseed easily in undisturbed soil. The new seedlings bloom the second year. Most other varieties live a long time. You are welcome to come & walk through our stockbeds and landscaped areas to see the established plants.

ST. NORBERT FARMERS MARKET

This year the Market starts **Saturday, May 21**, open 8 am - 3 pm

We will be there and we will also be open at our Selkirk location. We take our full assortment of plugs & pots, except shrubs. Check www.stnorbertfarmersmarket.ca

BOOKS

Naturescape Manitoba - An excellent book! Discover the beauty of southern Manitoba's native plants and the birds, butterflies and other wildlife they attract.

This book will help you landscape your yard with nature in mind. **\$24.95**

Native Plants for Prairie Gardens - Chock full of information on growing, using, propagating, & installing native plants in your garden. Includes lots of beautiful color photographs & descriptions of many wildflowers, grasses, trees & shrubs. **\$24.95**

Eco Yards - Simple Steps to Earth Friendly Landscapes - Explains how to create and look after gardens in earth friendly ways. Also discusses beneficial bugs, soil, compost tea, compost and water conservation. An excellent book. **\$19.95**

Manitoba Butterflies : A Field Guide - Covers 101 butterflies with over 1,100 photographs. The egg, larva, pupa & adult, of all 101 species are shown in photos, helping you to identify whatever you may find in the field. **\$39.00**

ROCK GARDENS

Alumroot	Crocus	Pink Onion

Flat Top Aster	Northern Bog Violet	Tall Meadow Rue
Golden Alexander	Obedient Plant	Tufted Hair Grass
Helenium	Saline Shooting Star	Turtlehead
Ironweed	Silverweed	Wild Iris & Wild Mint

FEED THE BIRDS

In summer a banquet of seed is laid out to attract seed eating birds. The species listed below are some of their favourites. Prairie plants also attract beneficial bugs, bees and butterflies for nectar. This in turn attracts many insect eating songbirds.

Coneflowers
Blazing Stars
Asters
Sunflowers
Prairie Clovers

Goldenrods
Big Bluestem
Indian Grass
Switch Grass
Prairie Dropseed

Most native shrubs also produce seeds and berries that birds love

Description

Pretty, ball shaped clusters of pink flowers - Fine onion type leaves can be used for flavouring - Great for prairie meadows - Reseeds easily
Tall groundcover with large, showy flowers on lush looking plants - Spreads to fill an area by roots - Combine with other aggressive or larger plants
Small silvery leaves form a very low ground cover - The flowers are in "pussy toe" clusters - Food plant for Am. Painted Lady butterfly caterpillars
This groundcover spreads by runners like Strawberries - Very adaptable plant grows in sun or shade & medium to wet soil - Erosion control - 4 pks only
Feathery, silver-grey leaves contrast nicely with other plants - Has a distinct sage fragrance - Can use in stuffing for poultry, fish or game or with rice
Silver, lance shaped leaves - Spreads quickly by roots - Used by Natives for smudging ceremonies - Drought tolerant - Host for American Painted Ladies
A well behaved milkweed in the garden - Very fragrant - Host plant for Monarch butterfly caterpillars - Somewhat slow to establish - 4 pks of XL plugs & pots
Milkweeds are the only plants that Monarch butterfly caterpillars feed on - Fine textured leaves - Spreads by roots but doesn't crowd others - Very fragrant
Large, bright yellow flowers in early May are a welcome end to winter - Round or kidney shaped leaves - Great for wet, boggy areas or shallow water in ponds
Graceful and delicate looking plant, often with many flowers per plant - Drought tolerant - Looks great with Avens, Whorled Milkweed and Little Bluestem
Fragrant flowers are similar to purple clover - More common in drier areas - Birds and butterflies come for seed and nectar - Good for fresh & dry bouquets
The glowing purple colour and unusual flower shape make this a favourite - Provides butterfly nectar and seed for birds - Excellent for fresh & dry bouquets
A captivating little plant with bright and striking flowers - Many flowers in a cluster - Moist to wet - Goes dormant every August
Used medicinally in past to treat many ailments & boost the immune system - Dry, sandy soil is best - Great cut flower & striking seed heads - Hummingbirds
Covered with loads of enchanting daisies with yellow centers - Good nectar plant for butterflies - Reseeds
Fast spreading groundcover - Running stems root at the tips - Sweet, juicy fruit - Full sun or part shade - 4 pks of XL plugs & 4.5" Pots
Sweetly scented white panicles of flowers brighten up the summer landscape - Spreads slowly by the roots - A good, medium size groundcover - Dries well
Excellent groundcover for dry areas - Unusual flowers always get noticed - Feathery pink seedheads called "Old Man's Whiskers" or "Prairie Smoke"
A bushy little plant covered with lots of yellow flowers - Lives 2 years but reseeds easily in bare soil - Often seen growing along roadsides
A versatile plant for sun or shade & dry to moist soil - The scalloped evergreen leaves form nice clumps - Nice for borders or for mixing in prairies
Many dense spikes of flowers attract butterflies and hummingbirds - Prefers drier areas than the Meadow Blazing Star - Dries well - 2 year old plugs

Description	
Striking flowers on small plants - Floral emblem of Saskatchewan - Blooming size plants are 3 - 4 years old - Not Available 2016	
Flowers last one day but new ones open every day for 6 wks - Everyone loves this plant when they see it - Lives 2 years but reseeds very easily - Plugs only	
Very fragrant leaves -Use to make tea or flavour drinks, sauces, jellies, salads, and new potatoes - Spreads very vigorously - For medium to wet areas	
Beautiful, low growing aster - Flowers cover the top of the plant, followed by little tan pompoms of seed - Combines well with Western Silvery Aster	
Manitoba's provincial flower - A harbinger of spring - Pleasing leaves come out after flowers - Distinctive feathery seedheads in May - 4.5" Pots only in June	
Fragrant pink flowers fade to white - Spreads by the roots - Red rose hips for tea, jelly & wildlife - Beautiful orange-red leaves in fall	
Loads of star shaped, bright blue flowers make this plant a showstopper - Not a grass but part of the Iris family - Reseeds easily - Also called Star Grass	
Earliest blooming goldenrod - Lots of nectar for butterflies, bees, pollinators & beneficial bugs - Spreads slowly - Dry to medium soil - Very drought tolerant	
Showy, nodding flowers - Goldenrods are an important late season nectar source for butterflies, bees, beneficial bugs, and pollinators - Drought tolerant	
Very pretty, mound forming aster covered with flowers - Soft, grey-green leaves - A rare plant found mainly in Bird's Hill Park - Drought tolerant	
A nice little plant that grows in full sun or part shade - Violets are food for Fritillary butterfly caterpillars - Reseeds easily and makes a good groundcover	
The most common blue violet - Prefers moist to wet areas in full sun or part shade - Food for Fritillary butterfly caterpillars - Reseeds easily	
Fast growing & drought tolerant - Great nectar plant for pollinators & beneficial bugs - Spreads by seed easily, so useful in difficult areas - Deer resistant	
Many 3"-4" flower spikes - Longblooming - Delightful for tea or in salads - Anise scented leaves - Goldfinches love the seeds - Excellent cut and dried flower	
Soft silvery leaves are a nice contrast with other plants - Dry flowers for bouquets - Food plant for Painted Lady butterfly caterpillars - Spreads slowly	
Hummingbirds like to visit this unusual flower for nectar - Has a yellow inner flower and an elegantly spurred red outer flower - Short lived but reseeds easily	
Dense clusters of creamy flowers & lush, attractive foliage - Nectar for bees, butterflies & hummingbirds - Host of Silvery & Western Tailed Blue butterflies	
A rare, native snapdragon - Squeeze the flower and the turtle opens its mouth - Only host for Baltimore Checkerspot butterfly caterpillars - Moist/wet, rich soil	
Clusters of flowers in flat heads - A fine textured goldenrod with narrow leaves and spreading roots - For moist to wet areas - Attracts butterflies for nectar	
Large, showy, yellow flowers with red centers - Nectar plant for butterflies - Fast growing - Lives 3 - 4 years - Good cut flower - Reseeds easily	
A gorgeous plant with brilliant blue flowers that never open up-Only bumblebees can get inside for nectar - Also called Bottle Gentian - Not available in 2016

Description

Purple flowers with orange centers cover the top of the plant - One of the Top Ten nectar plants for butterflies - Reseeds easily
Large, showy panicles of flowers on bushy plants - Grows in medium to moist, sunny or partly shaded areas - Bluish-green leaves are similar to Columbine
Fast growing & long blooming - The many gorgeous purple spikes seem to glow in the sunshine - Lives a few years & reseeds easily on moist soil - Nectar plant
Showy flowers in feathery heads at the top of the plant - Rare in Manitoba - Nectar plant for butterflies & host for American Painted Lady butterfly caterpillars
This rare and beautiful plant is crowned with slender, white spikes of flowers - Great with Meadow Blazing Star and tall grasses, in masses or as an accent
For shade - prefer rich, moist soil with lots of organic matter -
An excellent, taller groundcover for woodland areas - Mainly a foliage plant as flowers & fruit hide under leaves - Lovely, orange fall colour - 4.5" Pots only
Beautiful groundcover with velvety leaves - Unusual flowers hide under leaves - Medicinal with antifungal, anti-inflammatory, & disinfectant properties - 4.5" Pots
A great groundcover for moist shade - Has trailing, well branched stems - Flowers are not noticeable - A fine textured plant with small, light green leaves
A lush looking plant with many delightful little orange flowers - An annual that reseeds easily in moist to wet soil - Hummingbirds love it - 4.5" Pots in June
These fiddlehead ferns spread slowly by the roots & provide lush, green foliage - They do best in moist soil - 1 gallon pots \$10.50 & 4.5" pots \$7.95
Clusters of pink buds turn blue as the flowers open - A beautiful plant that reseeds easily - Hummingbird Clearwing Moths visit for nectar
Little bunches of white cylindric flowers are suspended from elegant, arching stems - Navy blue berries - Spreads slowly & lives long - 4 pks & 4.5" Pots
Clusters of starry flowers at tips of graceful, curving stems - Spreads to form a dense groundcover - Also called False Sol. Seal - Tolerates dry shade - 4.5" Pots
Large heart shaped leaves - Grows as a clump but spreads by reseeding easily in moist soil - Adds colour to spring shade gardens
A long blooming violet with loads of flowers - Spreads easily by roots & seed for a thick groundcover - For medium/moist soil or dry shade under evergreens
Clusters of bright orange fruit add colour to fall & winter landscapes - Male & female plants are needed to produce fruit - Yellow leaves in fall - 4.5" Pots
Masses of dainty flowers cover this dense, fastgrowing wild clematis - Grows in dry to medium soil and sun or shade - 4.5" Pots
Vigorous grower - Cut vines back in fall for spring growth - Host for Question Mark & Comma butterflies & Red Admiral & Hairstreaks - Sun/part shade - 4.5"
Excellent groundcover or climbing vine with dense foliage - Brilliant red leaves in fall light up the landscape - Sun or part shade, medium to moist soil - 4.5"
A vigorous climber for covering arbors, walls or use as groundcover to stabilize riverbanks - Flood tolerant - Sun/shade - Birds love the grapes - 4.5" & 1 Gal.

We always have a great selection of our Tough & Beautiful, native prairie grasses. These long lived grasses return from the roots year after year. They are not invasive. They are part of the Mixed Grass & Tall Grass Prairie that once covered much of

Description	
This clump grass provides early cover for later, warm season grasses like Big Bluestem and Indian Grass - Main cool season grass in Tall Grass Prairie	
Tall eye-catching grass with seedheads like a "Turkey Foot" - Beautiful rusty fall colour - THE grass of the Tall Grass Prairie - A warm season, clump grass	
Distinctive seedheads with tiny, bright orange flowers & seeds on one side of the stalk - Warm season, clump grass - Beautiful with other low flowers & grasses	
Drought tolerant, clump grass - Seedheads look like little toothbrushes hanging in the air - Best in sandy soil - Not for clay - Good with June grass & low flowers	
A great groundcover for wet meadows - Attractive grass-like clumps - Good for shoreline erosion control - Produces lots of seed for wildlife	
For shorelines & wet meadows - Attractive, cool season grass spreads by roots & is great for erosion control - Also called Canada Bluejoint - Shelter for birds	
Clumps of rich green foliage in spring are followed by graceful, fine textured seedheads in June - Sun or part shade - Great in moist to wet soils - Selfseeds	
Fast growing, clump grass - Attractive, curving seedheads - Bluish-green leaves - Sun or part shade - Reseeds very easily on bare soil - Lives 5-6 years	
Excellent clump grass for sun or shade conditions - Seedheads are eye-catching, erect white spikes 10-25 cm long - Reseeds easily on bare soil - Lives 5-6 years	
Seedheads have a reddish tinge in late June - Mixes well with Grama grasses and Little Bluestem for early season cover - Drought tolerant, clump grass	
Showy panicles of seeds - Great for moist to wet areas such as lakeshores, creeks, marshes and wetland edges - Spreading roots for erosion control	
Dry braids of this sacred grass are burned by Native people in smudging ceremonies as a purifier - Spreads rapidly by the roots in moist to wet areas	
Showy, white seedheads in June - Very drought tolerant - A cool season, clump grass - Best with low wildflowers & grasses in sandy soil - Short lived in clay	
Looks great in masses with lacy seedheads blowing in the breeze - Warm season, clump grass - Great in arrangements - Seed for birds - Host of Skippers	
A handsome grass for part or full shade - This cool season, clump grass has attractive drooping seedheads - Host for Northern Pearly Eye Butterfly	
Excellent, medium grass for landscaping - At peak in Aug/Sept. with fluffy, white seeds and orange-red foliage - Warm season, clump grass - Host for Skippers	
Silky, golden seedheads with bronze coloured leaves in fall - Excellent accent - Warm season, clump grass - Host for Skippers - Fresh & dry bouquets	
Elegant, ornamental grass with fragrant, silvery seedheads - Fine textured leaves turn golden-orange in fall - Warm season, clump grass - Seed for birds	
Fine textured, cool season, clump grass with long feathery seedheads - For dry to medium soils - Does not tolerate wet or poorly drained soils	

southern Manitoba and now exist only in remnants. Cool season grasses green up early & produce seed heads in June. Warm season grasses start growing in June & are lush and green all summer. They are at their peak in August and September.

NATIVE SHRUBS & TREES		Bloom Period	Flower Colour	Height in cm	
Saskatoon	<i>Amelanchier alnifolia</i>	D	May	white	3-4 metres
Leadplant	<i>Amorpha canescens</i>	D	June	blue/purple	30 - 90
Indigo Bush	<i>Amorpha fruticosa</i>	D	June	dark purple	2-3 metres
Dwarf False Indigo	<i>Amorpha nana</i>	D	June	red/purple	30 - 50
Pagoda Dogwood	<i>Cornus alternifolia</i>		June	white	2-5 metres
Grey Dogwood	<i>Cornus racemosa</i>	D	June	white	1-2 metres
Red Osier Dogwood	<i>Cornus sericea sericea</i>	D	June	white	1-3 metres
Hazelnut	<i>Corylus cornuta</i>	D	May	tiny red	1-3 metres
Hawthorn	<i>Crataegus chrysoarpa</i>	D	June	white	2-4 metres
Bush Honeysuckle	<i>Diervilla lonicera</i>		June-July	yellow	50 - 100
Silverberry	<i>Eleagnus commutata</i>	D	June	yellow	2-3 metres
NEW Wild Plum	<i>Prunus americana</i>		May	white	3-5 metres
Western Sandcherry	<i>Prunus pumila besseyi</i>		May	white	15 - 50
Wild Black Currant	<i>Ribes americanum</i>	D	May	yellow	90 - 120
Prickly Rose	<i>Rosa acicularis</i>	D	June	pink	60 - 120
Wild Raspberry	<i>Rubus idaeus</i>	D	June	white	100 - 150
Buffaloberry	<i>Shepherdia argentea</i>	D			3-5 metres
Narrowleaf Meadowsweet	<i>Spiraea alba</i>	D	July	white	50 -100
Nannyberry	<i>Viburnum lentago</i>		June	white	3-4 metres
Downy Arrowwood	<i>Viburnum rafinesquianum</i>		June	white	90 - 150
Highbush Cranberry	<i>Viburnum trilobum</i>		June	white	2-4 metres
White Cedar	<i>Thuja occidentalis</i>				10-20 metres

Description
 Purple fruit is great to eat fresh or for Saskatoon Pie - Early to bloom - Host for Hairstreak butterflies - Bees love it - Sun, dry/medium soil - 4.5" pots & 2 Gal.
The glowing, blue/purple flower spikes attract butterflies & many bees for nectar - A rare prairie shrub with grey/green leaves - Sun & dry/medium soil - 4.5" Pots
A rare shrub with gorgeous, dark purple flower spikes - Host to Alfalfa butterflies, Silver Spotted Skippers & many native bees-Sun & medium/moist soil - 4.5" Pots
A small, rare shrub with fragrant, reddish-purple flowers in spikes - Bees love it - Attractive, fine textured leaves - Sun & medium to moist soil - 4.5" Pots
Showy clusters of flowers and dark blue berries that birds love - Excellent for many pollinators too - Rare - Part Shade/Shade & medium/moist soil - 1 & 2 Gal.
Birds love the white berries - Host for the Spring Azure blue butterflies - Purple fall colour - Sun or shade & medium to moist soil - 4.5" Pots & 1 Gal. & 2 Gal.
Red bark adds winter colour - White berries attract birds - Host of Spring Azure - Good for riverbanks - Sun or shade, medium to wet soil - 4.5" Pots & 2 Gal.
Nuts can be roasted and eaten - Excellent golden orange fall colour - Spreads slowly to form dense clumps - Sun & dry/medium soil - 4.5" Pots, 1 & 2 Gal.
Very attractive shrub with stout thorns - Loaded with beautiful, white flowers & bright red fruit - Host of Harvester butterflies & Hairstreaks - 4.5" Pots, 1 & 2 Gal.
Great as a tall groundcover in sun or shade & dry/medium soil - Red/gold fall colour- Clusters of yellow funnel shaped flowers- Spreads- 4.5" Pots, 1 & 2 Gal.
Silver leaves & berries - Also called Wolf Willow - Thicket forming shrub spreads by roots - Great for wildlife & erosion control - Sun, dry/med. soil - 4.5" Pots & 2 Gal.
A mass of flowers covers the plant before the leaves emerge - Medium to moist soil - Red plums - Host of Spring Azure & Swallowtail butterflies - 2 Gal.
Prolific flowers are followed by tart, purple, edible cherries - Attracts native bees - Native to dry, sandy prairies - Sun, dry/medium soil - 4.5" Pots & 2 Gal.
A great shrub for moist/wet areas in sun or shade - Edible black berries - Birds love the fruit too - Host of Harvester butterfly - Fast Growing - 4.5" Pots
Fragrant flowers produce red rose hips - Floral emblem of Alberta - Host for Hairstreaks & bees-Spreads- Sun/Pt. shade, med./moist soil- 4.5" Pots & 2 Gal.
Very tasty fruit, great for eating fresh or in jam or pies - Fresh or dried leaves make excellent tea - Spreads -Medium to moist soil in sun or shade - 4.5" Pots
Thorny shrub with silver leaves & red berries - Sour berries make good jelly after a frost - 2 or more needed for fruit - Sun & dry/medium soil - 4.5" Pots & 2 Gal.
Pyramidal clusters of fuzzy flowers - Host for Spring Azure butterflies - Nectar for butterflies and bees - Sun/part shade, medium/moist soil - 4.5" Pots & 2 Gal.
Shiny leaves, flat clusters of flowers & navy blue berries - Bright red fall colour - Viburnums host Spring Azures - Sun/Shade, medium/moist - 2 Gal.
Round flower clusters are followed by navy/black berries for birds & other wildlife - Purple leaves in fall - Sun/shade, dry to moist - 4.5" Pots, 1 & 2 Gal.
Sun/shade & medium to wet soil - Showy flowers & red berries - Brilliant red fall foliage - Host for Hummingbird Clearwing Moth - 4.5" Pots, 1 & 2 Gal.
Beautiful tree or shelterbelt with pyramidal shape 3-5 metres wide - Grows fast in well drained soil & slower in wet - Sun/shade, medium to wet - 4.5" Pots

SEED MIXES

If your area is too big to plant plugs or pots these mixes will help you create some prairie habitat more economically. They are designed to provide lots of diversity with 50% wildflowers in Prairie Mixes, 70% flowers in Part Shade / Woodland Mix. Seed is in short supply so order early to avoid disappointment.

Short Butterfly Prairie Mix

For Sun & Dry to Medium Soil 1' - 3' Tall

There are lots of host & nectar plants in this mix. Flowers from spring to fall provide food for butterflies all season and many beautiful flowers. Sandy or loam soil is best.

Heartleaf Alexander	Gaillardia	Gumweed
Harebell	White Prairie Clover	Low & Showy Goldenrod
Long Fruited Anemone	Philadelphia Fleabane	Smooth Aster
Yarrow	Wild Bergamot	Sheep Fescue
Whorled Milkweed	Meadow Blazing Star	June Grass
Black Eyed Susan	Many Flowered Aster	Little Bluestem
Coneflower	Upland White Aster	Side Oats Grama
Purple Prairie Clover	Western Silvery Aster	Prairie Dropseed

Tall Butterfly Prairie Mix

For Sun & Medium to Moist Soil 3' to 5' Tall

This mix evokes the Tall Grass Prairie that once covered part of southern Manitoba. The plants evolved here so they do fine on our clay soil. Fall seeding is best on clay.

Canada Anemone	Wild Bergamot	New England Aster
Heartleaf Alexander	Black Eyed Susan	Smooth & Many Fl. Aster
Golden Alexander	Helenium	Big Bluestem
Yarrow & Wild Mint	Stiff Goldenrod	Indian Grass
Giant Hyssop	Culver's Root	Switchgrass
False Sunflower	Canada Milkvetch	Green Needle Grass
Swamp Milkweed	Joe Pye & Blue Vervain	Awnead Wheatgrass
Purple Prairie Clover	Narrowleaf Sunflower	Canada Wild Rye

Seed Mix Prices

Area Covered	20 sq.m. (215 sq.ft.)	100 sq.m. (1,076 sq.ft.)	500 sq.m. (5,380 sq.ft.)
Seed Mix	28 grams	140 grams	700 grams
Short Butterfly Prairie - Dry/Medium	\$38.00	\$110.00	\$435.00
Tall Butterfly Prairie - Medium/Moist	\$33.00	\$96.00	\$375.00

SEED MIXES

Wet Prairie Mix

For Sun & Moist to Wet Soil 3' to 5' Tall

For low areas a little wetter than normal, these species do very well. They tolerate wet feet as well as dry periods between rains. The beautiful flowers attract lots of birds, butterflies and beneficial bugs too. Excellent for medium to heavy clay soils.

Golden Alexander	Obedient Plant	Turtlehead
Wild Iris	Stiff Goldenrod	New England Aster
Swamp Milkweed	Culver's Root	Tufted Hairgrass
Wild Mint	Joe Pye & Helenium	Big Bluestem
Black Eyed Susan	Flat Top Goldenrod	Switchgrass
Blue Vervain	Ironweed	Slough Grass
Smooth Camas	Narrowleaf Sunflower	Bebb's Sedge

Part Shade / Woodland Mix

If you don't have enough sun for a prairie, this mix will do much better. All species thrive in part shade with a few hours of sun daily. It is best for rich, medium to moist soil. Not recommended for dry, sandy soil.

		Turtlehead
Golden Alexander	Giant Hyssop	New England Aster
Western Canada Violet	False Sunflower	Smooth Aster
Early Blue Violet	Blue Vervain	Tufted Hairgrass
Wild Columbine	Culver's Root	Giant Wild Rye
Canada Anemone	Downy Yellow Violet	Big Bluestem
Philadelphia Fleabane	Flat Top Aster	Purple Oat Grass

Seed Mix Prices

Area Covered	20 sq.m. (215 sq.ft.)	100 sq.m. (1,076 sq.ft.)	500 sq.m. (5,380 sq.ft.)
Seed Mix	28 grams	140 grams	700 grams
Wet Prairie Mix	\$38.00	\$110.00	\$435.00
Part Shade / Woodland Mix	\$44.00	\$127.00	\$495.00

SEEDING INSTRUCTIONS

Creating a native plant community from seed is a long term investment. Using our original prairie species, you can create a beautiful & diverse natural landscape that returns year after year. It is not as simple as Mother Nature makes it look though. Planning, preparation & maintenance are important for successful establishment. And patience is required since it takes 3-4 years for the community to establish. **See website for instructions on planning, preparation, seeding & maintenance.**

GARDEN COLLECTIONS

Each Garden Collection comes with complete planting layout and instructions

Butterfly Garden

For medium to moist soil in full sun

This garden has host plants for 4 kinds of butterfly caterpillars & lots of nectar plants for adult butterflies. There are blooms from spring until fall. Grasses give a prairie feel to the garden, provide a lush green backdrop for flowers & fall interest & colour.
