2016
Our plants are all grown from seed collected in Manitoba. Seed was initially collected from wild stock but now over 90% is collected from our own stock beds. You get a very high survival rate when transplanting our plants into your garden. This is because the roots are not cut off or disturbed as they are when plants are dug from the wild. They just keep on growing. All the plants are perennials, however, perennials have assorted lifespans. Some fast growing varieties such as Black-Eyed Susan, Gaillardia, and Yellow Coneflower live a few years. These short lived varieties reseed easily in undisturbed soil. The new seedlings bloom the second year. Most other varieties live a long time. You are welcome to come & walk through our stockbeds and landscaped areas to see the established plants.

**ST. NORBERT FARMERS MARKET**

This year the Market starts **Saturday, May 21**, open 8 am - 3 pm

We will be there and we will also be open at our Selkirk location. We take our full assortment of plugs & pots, except shrubs. Check www.stnorbertfarmersmarket.ca

**BOOKS**

**Natureescape Manitoba** - An excellent book! Discover the beauty of southern Manitoba's native plants and the birds, butterflies and other wildlife they attract. This book will help you landscape your yard with nature in mind. $24.95

**Native Plants for Prairie Gardens** - Chock full of information on growing, using, propagating, & installing native plants in your garden. Includes lots of beautiful color photographs & descriptions of many wildflowers, grasses, trees & shrubs. $24.95

**Eco Yards - Simple Steps to Earth Friendly Landscapes** - Explains how to create and look after gardens in earth friendly ways. Also discusses beneficial bugs, soil, compost tea, compost and water conservation. An excellent book. $19.95

**Manitoba Butterflies : A Field Guide** - Covers 101 butterflies with over 1,100 photographs. The egg, larva, pupa & adult, of all 101 species are shown in photos, helping you to identify whatever you may find in the field. $39.00

**ROCK GARDENS**

- Alumroot
- Blue-Eyed Grass
- Blue Grama Grass
- Crocus
- Dotted Blazing Star
- Early Blue Violet
- Harebell
- Pink Onion
- Purple Coneflower
- Pussy Toes
- Three Flowered Avens

**ATTRACT BUTTERFLIES**

- Black-Eyed Susan
- Blue Vervain
- Canada Milkvetch
- Coneflower
- Dotted Blazing Star
- Early Blue Violet
- Flat Top Goldenrod
- Flat Top Aster
- Gaillardia
- Giant Hyssop
- Golden Alexander
- Heartleaf Alexander
- Helinium
- Ironweed
- Joe Pye
- Low Goldenrod
- Many flowered Aster
- Meadow Blazing Star
- New England Aster
- Northern Bog Violet
- Obedient Plant
- Pearly Everlasting
- Prairie Sage
- Purple Coneflower
- Pussy Toes
- Purple Prairie Clover
- Showy Goldenrod
- Smooth Aster
- Smooth Camas
- Swamp Milkweed
- Tall Coneflower
- Turtlehead
- Dwarf & Whorled Milkweed
- Wild Bergamot
- Wild Columbine

**PART SHADE**

- Alumroot
- Awned Wheatgrass
- Bebb’s Sedge
- Big Bluestem
- Blue Eyed Grass
- Blue Vervain
- Canada Anemone
- Canada Wild Rye
- Closed Gentian
- Culver’s Root
- Downy Yellow Violet
- Early Blue Violet
- False Sunflower
- Flat Top Aster
- Giant Hyssop
- Giant Wild Rye
- Golden Alexander
- Harebell
- Joe Pye
- Marsh Marigold
- New England Aster
- Northern Bedstraw
- Northern Bog Violet
- Obedient Plant
- Ostrich Fern
- Pearly Everlasting
- Red Lily
- Philadelphia Fleabane
- Purple Oat Grass
- Sarsaparilla
- Silverweed
- Smooth Aster
- Smooth Camas
- Sweet Scented Bedstraw
- Tall Coneflower
- Tall Meadow Rue
- Touch Me Not
- Tufted Hair Grass
- Turtlehead
- Western Canada Violet
- Wild Columbine
- Wild Ginger
- Wild Iris
- Wild Strawberry

**GROUNDCOVERS**

- Canada Anemone
- Downy Yellow Violet
- Early Blue Violet
- Low Goldenrod
- Northern Bedstraw
- Obedient Plant
- Pussy Toes
- Sarsaparilla
- Silverweed
- Star Flower Solomon’s Seal
- Sweet Scented Bedstraw
- Three Flowered Avens
- Western Canada Violet
- Wild Ginger
- Wild Mint
- Wild Strawberry
- Virginia Creeper
In summer a banquet of seed is laid out to attract seed eating birds. The species listed below are some of their favourites. Prairie plants also attract beneficial bugs, bees and butterflies for nectar. This in turn attracts many insect eating songbirds.

**FEED THE BIRDS**

**WILDFLOWER & GRASS SEED**

Bloom Period | June  
Flower Colour | beige  
Height in cm | 30 - 50  
Dotted Blazing Star | *Liatris punctata*  
Bloom Period | August  
Flower Colour | pink  
Height in cm | 20 - 30  

Food plant for Am. Painted Lady butterfly caterpillars  
Feathery, silver-grey leaves contrast nicely with other plants - Has a distinct sage fragrance - Can use in stuffing for poultry, fish or game or with rice  
Silver, lance shaped leaves - Spreads quickly by roots - Used by Natives for smudging ceremonies - Drought tolerant - Host for American Painted Ladies  
A well behaved milkweed in the garden - Very fragrant - Host plant for Monarch butterfly caterpillars - Somewhat slow to establish - 4 pks of XL plugs & pots  
Milkweeds are the only plants that Monarch butterfly caterpillars feed on - Fine textured leaves - Spreads by roots but doesn't crowd others - Very fragrant  
Large, bright yellow flowers in early May are a welcome end to winter - Round or kidney shaped leaves - Great for wet, boggy areas or shallow water in ponds  
Graceful and delicate looking plant, often with many flowers per plant - Drought tolerant - Looks great with Avens, Whorled Milkweed and Little Bluestem  
Fragrant flowers are similar to purple clover - More common in drier areas - Birds and butterflies come for seed and nectar - Good for fresh & dry bouquets  
The glowing purple colour and unusual flower shape make this a favourite - Provides butterfly nectar and seed for birds - Excellent for fresh & dry bouquets  
A captivating little plant with bright and striking flowers - Many flowers in a cluster - Moist to wet - Goes dormant every August  
Used medicinally in past to treat many ailments & boost the immune system - Dry, sandy soil is best -Great cut flower & striking seed heads - Hummingbirds  
Covered with loads of enchanting daisies with yellow centers - Good nectar plant for butterflies - Reseeds  
Fast spreading groundcover - Running stems root at the tips - Sweet, juicy fruit - Full sun or part shade - 4 pks of XL plugs & 4.5" Pots  
Sweetly scented white panicles of flowers brighten up the summer landscape - Spreads slowly by the roots - A good, medium size groundcover - Dries well  
Excellent groundcover for dry areas - Unusual flowers always get noticed - Feathery pink seedheads called "Old Man's Whiskers" or "Prairie Smoke"  
A bushy little plant covered with lots of yellow flowers - Lives 2 years but reseeds easily in bare soil - Often seen growing along roadsides  
A versatile plant for sun or shade & dry to moist soil - The scalloped evergreen leaves form nice clumps - Nice for borders or for mixing in prairies  
Many dense spikes of flowers attract butterflies and hummingbirds - Prefers drier areas than the Meadow Blazing Star - Dries well - 2 year old plugs

### Description

- **Striking flowers on small plants - Floral emblem of Saskatchewan** - Blooming size plants are 3 - 4 years old - **Not Available 2016**
- **Flowers last one day but new ones open every day for 6 wks - Everyone loves this plant when they see it** - Lives 2 years but reseeds very easily - **Plugs only**
- **Very fragrant leaves - Use to make tea or flavour drinks, sauces, jellies, salads, and new potatoes - Spreads very vigorously - For medium to wet areas**
- **Beautiful, low growing aster - Flowers cover the top of the plant, followed by little tan pompoms of seed - Combines well with Western Silvery Aster**
- **Manitoba's provincial flower - A harbinger of spring - Pleasing leaves come out after flowers - Distinctive feathery seedheads in May - 4.5" Pots only in June**
- **Fragrant pink flowers fade to white - Spreads by the roots - Red rose hips for tea, jelly & wildlife - Beautiful orange-red leaves in fall**
- **Loads of star shaped, bright blue flowers make this plant a showstopper - Not a grass but part of the Iris family - Reseeds easily - Also called Star Grass**
- **Earliest blooming goldenrod - Lots of nectar for butterflies, bees, pollinators & beneficial bugs - Spreads slowly - Dry to medium soil - Very drought tolerant**
- **Showy, nodding flowers - Goldenrods are an important late season nectar source for butterflies, bees, beneficial bugs, and pollinators - Drought tolerant**
- **Very pretty, mound forming aster covered with flowers - Soft, grey-green leaves - A rare plant found mainly in Bird's Hill Park - Drought tolerant**
- **A nice little plant that grows in full sun or part shade - Violets are food for Fritillary butterfly caterpillars - Reseeds easily and makes a good groundcover**
- **The most common blue violet - Prefers moist to wet areas in full sun or part shade - Food for Fritillary butterfly caterpillars - Reseeds easily**
- **Fast growing & drought tolerant - Great nectar plant for pollinators & beneficial bugs - Spreads by seed easily, so useful in difficult areas - Deer resistant**
- **Many 3”-4” flower spikes - Longblooming - Delightful for tea or in salads - Anise scented leaves - Goldfinches love the seeds - Excellent cut and dried flower**
- **Soft silvery leaves are a nice contrast with other plants - Dry flowers for bouquets - Food plant for Painted Lady butterfly caterpillars - Spreads slowly**
- **Hummingbirds like to visit this unusual flower for nectar - Has a yellow inner flower and an elegantly spurred red outer flower - Short lived but reseeds easily**
- **Dense clusters of creamy flowers & lush, attractive foliage - Nectar for bees, butterflies & hummingbirds - Host of Silvery & Western Tailed Blue butterflies**
- **A rare, native snapdragon - Squeeze the flower and the turtle opens its mouth - Only host for Baltimore Checkerspot butterfly caterpillars - Moist/wet, rich soil**
- **Clusters of flowers in flat heads - A fine textured goldenrod with narrow leaves and spreading roots - For moist to wet areas - Attracts butterflies for nectar**
- **Large, showy, yellow flowers with red centers - Nectar plant for butterflies - Fast growing - Lives 3 - 4 years - Good cut flower - Reseeds easily**
- **A gorgeous plant with brilliant blue flowers that never open up - Only bumblebees can get inside for nectar - Also called Bottle Gentian - Not available in 2016**

### Description

**Purple flowers with orange centers cover the top of the plant - One of the Top Ten nectar plants for butterflies - Reseeds easily**

- Large, showy panicles of flowers on bushy plants - Grows in medium to moist, sunny or partly shaded areas - Bluish-green leaves are similar to Columbine
- Fast growing & long blooming - The many gorgeous purple spikes seem to glow in the sunshine - Lives a few years & reseeds easily on moist soil - Nectar plant
- Showy flowers in feathery heads at the top of the plant - Rare in Manitoba - Nectar plant for butterflies & host for American Painted Lady butterfly caterpillars
- This rare and beautiful plant is crowned with slender, white spikes of flowers - Great with Meadow Blazing Star and tall grasses, in masses or as an accent

**For shade - prefer rich, moist soil with lots of organic matter**

- An excellent, taller groundcover for woodland areas - Mainly a foliage plant as flowers & fruit hide under leaves - Lovely, orange fall colour - **4.5" Pots only**
- Beautiful groundcover with velvety leaves - Unusual flowers hide under leaves - Medicinal with antifungal, anti-inflammatory, & disinfectant properties - **4.5" Pots**
- A great groundcover for moist shade - Has trailing, well branched stems - Flowers are not noticeable - A fine textured plant with small, light green leaves
- A lush looking plant with many delightful little orange flowers - An annual that reseeds easily in moist to wet soil - Hummingbirds love it - **4.5" Pots in June**
- These fiddlehead ferns spread slowly by the roots & provide lush, green foliage - They do best in moist soil - **1 gallon pots $10.50 & 4.5" pots $7.95**
- Clusters of pink buds turn blue as the flowers open - A beautiful plant that reseeds easily - Hummingbird Clearwing Moths visit for nectar
- Little bunches of white cylindric flowers are suspended from elegant, arching stems - Navy blue berries - Spreads slowly & lives long - **4 pks & 4.5" Pots**
- Clusters of starry flowers at tips of graceful, curving stems - Spreads to form a dense groundcover - Also called False Sol. Seal - Tolerates dry shade - **4.5" Pots**
- Large heart shaped leaves - Grows as a clump but spreads by reseeding easily in moist soil - Adds colour to spring shade gardens
- A long blooming violet with loads of flowers - Spreads easily by roots & seed for a thick groundcover - For medium/moist soil or dry shade under evergreens
- Clusters of bright orange fruit add colour to fall & winter landscapes - Male & female plants are needed to produce fruit - Yellow leaves in fall - **4.5" Pots**
- Masses of dainty flowers cover this dense, fastgrowing wild clematis - Grows in dry to medium soil and sun or shade - **4.5" Pots**
- Vigorous grower - Cut vines back in fall for spring growth - Host for Question Mark & Comma butterflies & Red Admiral & Hairstreaks - Sun/part shade - **4.5"**
- Excellent groundcover or climbing vine with dense foliage - Brilliant red leaves in fall light up the landscape - Sun or part shade, medium to moist soil - **4.5"**
- A vigorous climber for covering arbors, walls or use as groundcover to stabilize riverbanks - Flood tolerant - Sun/shade - Birds love the grapes - **4.5" & 1 Gal.**
This clump grass provides early cover for later, warm season grasses like Big Bluestem and Indian Grass — Main cool season grass in Tall Grass Prairie.

Tall eye-catching grass with seedheads like a "Turkey Foot" — Beautiful rusty fall colour — THE grass of the Tall Grass Prairie — A warm season, clump grass

Distinctive seedheads with tiny, bright orange flowers & seeds on one side of the stalk — Warm season, clump grass — Beautiful with other low flowers & grasses

Drought tolerant, clump grass — Seedheads look like little toothbrushes hanging in the air — Best in sandy soil — Not for clay — Good with June grass & low flowers

A great groundcover for wet meadows — Attractive grass-like clumps — Good for shoreline erosion control — Produces lots of seed for wildlife

For shorelines & wet meadows — Attractive, cool season grass spreads by roots & is great for erosion control — Also called Canada Bluejoint — Shelter for birds

Clumps of rich green foliage in spring are followed by graceful, fine textured seedheads in June — Sun or part shade — Great in moist to wet soils — Selfseeds

Fast growing, clump grass — Attractive, curving seedheads — Bluish-green leaves — Sun or part shade — Reseeds very easily on bare soil — Lives 5-6 years

Excellent clump grass for sun or shade conditions — Seedheads are eye-catching, erect white spikes 10-25 cm long — Reseeds easily on bare soil — Lives 5-6 years

Seedheads have a reddish tinge in late June — Mixes well with Grama grasses

Showy panicles of seeds — Great for moist to wet areas such as lakeshores and Little Bluestem for early season cover — Drought tolerant, clump grass

Showy panicles of seeds — Great for moist to wet areas such as lakeshores creeks, marshes and wetland edges — Spreading roots for erosion control

Dry braids of this sacred grass are burned by Native people in smudging ceremonies as a purifier — Spreads rapidly by the roots in moist to wet areas

Showy, white seedheads in June — Very drought tolerant — A cool season, clump grass — Best with low wildflowers & grasses in sandy soil — Short lived in clay

Looks great in masses with lacy seedheads blowing in the breeze — Warm season, clump grass — Great in arrangements — Seed for birds

A handsome grass for part or full shade — This cool season, clump grass has attractive drooping seedheads — Host for Northern Pearly Eye Butterfly

Excellent, medium grass for landscaping — At peak in Aug/Sept. with fluffy, white seeds and orange-red foliage — Warm season, clump grass — Host for Skippers

Silky, golden seedheads with bronze coloured leaves in fall — Excellent accent — Warm season, clump grass — Host for Skippers — Fresh & dry bouquets

Elegant, ornamental grass with fragrant, silvery seedheads — Fine textured leaves turn golden-orange in fall — Warm season, clump grass — Seed for birds

Fine textured, cool season, clump grass with long feathery seedheads — For dry to medium soils — Does not tolerate wet or poorly drained soils

We always have a great selection of our Tough & Beautiful, native prairie grasses. These long lived grasses return from the roots year after year. They are not invasive. They are part of the Mixed Grass & Tall Grass Prairie that once covered much of southern Manitoba and now exist only in remnants. Cool season grasses green up early & produce seed heads in June. Warm season grasses start growing in June & are lush and green all summer. They are at their peak in August and September.

**Description**

- **Saskatoon May** white 3-4 metres
  - Purple fruit is great to eat fresh or for Saskatoon Pie - Early to bloom - Host for Hairstreak butterflies - Bees love it - Sun, dry/medium soil - 4.5" pots & 2 Gal.
  - A rare shrub with grey/green leaves - Sun & dry/medium soil - 4.5" Pots

- **Leadplant June** blue/purple 3-4 metres
  - The glowing, blue/purple flower spikes attract butterflies & many bees for nectar - A rare prairie shrub with grey/green leaves & many native bees-Sun & dry/medium soil - 4.5" Pots

- **Indigo Bush June** dark purple 2-3 metres
  - A rare shrub with gorgeous, dark purple flower spikes - Host to Alfalfa butterflies, Silver Spotted Skippers & many native bees-Sun & dry/medium soil - 4.5" Pots

- **Dwarf False Indigo June** red/purple 30 - 50 metres
  - A small, rare shrub with fragrant, reddish-purple flowers in spikes - Bees love it - Attractive, fine textured leaves - Sun & medium to moist soil - 4.5" Pots

- **Pagoda Dogwood June** white 2-5 metres
  - Showy clusters of flowers and dark blue berries that birds love - Excellent for many pollinators too - Rare - Part Shade/Shade & medium/moist soil - 1 & 2 Gal.

- **Grey Dogwood June** white 1-2 metres
  - Birds love the white berries - Host for the Spring Azure blue butterflies - Purple fall colour - Sun or shade & medium to moist soil - 4.5" Pots & 1 & 2 Gal.

- **Red Osier Dogwood June** white 1-3 metres
  - Red bark adds winter colour - White berries attract birds - Host of Spring Azure butterflies - Purple fall colour - Sun or shade & medium to moist soil - 4.5" Pots & 1 & 2 Gal.

- **Hazelnut May** tiny red 1-3 metres
  - Very attractive shrub with stout thorns - Loaded with beautiful, white flowers & bright red fruit - Host of Harvester butterflies & Hairstreaks - 4.5" Pots, 1 & 2 Gal.

- **Hawthorn June** white 2-4 metres
  - Great as a tall groundcover in sun or shade & dry/medium soil - Red/gold fall colour - Clusters of yellow funnel shaped flowers - Spreads - 4.5" Pots, 1 & 2 Gal.

- **Bush Honeysuckle June-July** yellow 50 - 100 metres
  - Silver leaves & berries - Also called Wolf Willow - Thicket forming shrub spreads by roots - Great for wildlife & erosion control - Sun, dry/med. soil - 4.5" Pots & 2 Gal.

- **Silverberry June** yellow 2-3 metres
  - A mass of flowers covers the plant before the leaves emerge - Medium to moist soil - Red plums - Host of Spring Azure & Swallowtail butterflies - 2 Gal.

- **Wild Plum May** white 3-5 metres
  - Prolific flowers are followed by tart, purple, edible cherries - Attracts native bees - Native to dry, sandy prairies - Sun, dry/medium soil - 4.5" Pots & 2 Gal.

- **Western Sandcherry May** white 15 - 50 metres
  - A great shrub for moist/wet areas in sun or shade - Edible black berries - Birds love the fruit too - Host of Harvester butterfly - Fast Growing - 4.5" Pots

- **Wild Black Currant May** yellow 90 - 120 metres
  - Fragrant flowers produce red rose hips - Floral emblem of Alberta - Host for Hairstreaks & bees-Spreads- Sun/Plt. shade, med./moist soil- 4.5" Pots & 2 Gal.

- **Prickly Rose June** pink 60 - 120 metres
  - Very tasty fruit, great for eating fresh or in jam or pies - Fresh or dried leaves make excellent tea - Spreads - Medium to moist soil in sun or shade - 4.5" Pots

- **Wild Raspberry June** white 100 - 150 metres
  - Thorny shrub with silver leaves & red berries - Sour berries make good jelly after a frost - 2 or more needed for fruit - Sun & dry/medium soil - 4.5" Pots & 2 Gal.

- **Buffaloberry July** white 50 -100 metres
  - Pyramidal clusters of fuzzy flowers - Host for Spring Azure butterflies - Nectar for butterflies and bees - Sun/part shade, medium/moist soil - 4.5" Pots & 2 Gal.

- **Narrowleaf Meadowsweet July** white 50 -100 metres
  - Shiny leaves, flat clusters of flowers & navy blue berries - Bright red fall colour - Viburnums host Spring Azures - Sun/Shade, medium/moist - 2 Gal.

- **Nannyberry June** white 3-4 metres
  - Round flower clusters are followed by nappy/black berries for birds & other wildlife - Purple leaves in fall - Sun/shade, dry to moist - 4.5" Pots, 1 & 2 Gal.

- **Downy Arrowwood June** white 90 - 150 metres
  - Sun/shade & medium to wet soil - Showy flowers & red berries - Brilliant red fall foliage - Host for Hummingbird Clearwing Moth - 4.5" Pots, 1 & 2 Gal.

- **Highbush Cranberry June** white 2-4 metres
  - Beautiful tree or shelterbelt with pyramidal shape 3-5 metres wide - Grows fast in well drained soil & slower in wet - Sun/shade, medium to wet - 4.5" Pots
## SEED MIXES

### Wet Prairie Mix

For Sun & Moist to Wet Soil  3' to 5' Tall

For low areas a little wetter than normal, these species do very well. They tolerate wet feet as well as dry periods between rains. The beautiful flowers attract lots of birds, butterflies and beneficial bugs too. Excellent for medium to heavy clay soils.

### Part Shade / Woodland Mix

If you don’t have enough sun for a prairie, this mix will do much better. All species thrive in part shade with a few hours of sun daily. It is best for rich, medium to moist soil. Not recommended for dry, sandy soil.

### SEEDING INSTRUCTIONS

Creating a native plant community from seed is a long term investment. Using our original prairie species, you can create a beautiful & diverse natural landscape that returns year after year. It is not as simple as Mother Nature makes it look though. Planning, preparation & maintenance are important for successful establishment. And patience is required since it takes 3-4 years for the community to establish.

See website for instructions on planning, preparation, seeding & maintenance.

### Butterfly Garden

For medium to moist soil in full sun

- 2 Early Blue Violet
- 3 Heartleaf Alexander
- 3 Pearly Everlasting
- 3 Wild Bergamot
- 6 Prairie Dropseed

**30 Plants** in 4.5” pots

**$175.00** Covers 3 sq. metres, Approx. 2.5m x 1.2 m

**$175.00** Covers 3.25 sq. metres, Approx. 2.75m x 1.25m

### Pollinator Garden

A diversity of native plants and bloom times helps support the greatest variety and abundance of pollinators. These are great for native bees - we have 100’s of kinds.

- 4 Heartleaf Alexander
- 2 Giant Hyssop
- 4 Gaillardia
- 5 Purple Prairie Clover
- 5 Showy Goldenrod
- 3 Smooth Aster
- 3 Culver’s Root
- 4 Little Bluestem

**30 Plants** in 4.5” pots

**$175.00** Covers 3.25 sq. metres, Approx. 2.75m x 1.25m

For medium/moist soil in full sun

### Deer Won’t Eat This Garden

For medium to moist soil in full sun

This garden has host plants for 4 kinds of butterfly caterpillars & lots of nectar plants for adult butterflies. There are blooms from spring until fall. Grasses give a prairie feel to the garden, provide a lush green backdrop for flowers & fall interest & colour.

- 2 Early Blue Violet
- 3 Black Eyed Susan
- 2 Joe Pye
- 3 Heartleaf Alexander
- 5 Swamp Milkweed
- 2 New England Aster
- 4 Wild Bergamot
- 6 Prairie Dropseed

**30 Plants** in 4.5” pots

**$175.00** Covers 3 sq. metres, Approx. 2.5m x 1.2 m

**$175.00** Covers 3.25 sq. metres, Approx. 2.75m x 1.25m

**$132.00** Covers 7 sq. metres, Approx. 3.9 m x 1.8 m

**$132.00** Covers 7 sq. metres, Approx. 3.9 m x 1.8 m

### Garden for the Birds

For medium to moist soil in full sun

These plants provide lots of food, nectar & shelter for birds such as goldfinches & hummingbirds. In addition you get beautiful flowers throughout the season. Your garden becomes a birdfeeder in summer & fall as the seeds ripen.

- 3 Wild Columbine
- 2 Giant Hyssop
- 3 False Sunflower
- 4 Wild Bergamot
- 1 Purple Prairie Clover
- 1 Narrowleaf Sunflower
- 2 Stiff Goldenrod
- 2 Smooth Aster
- 1 New England Aster
- Grasses
- 2 Little Bluestem

If you cannot visit Prairie Originals you may order by phone, fax, mail or Email. Your order will be shipped by bus and will arrive in one day anywhere in Manitoba, Saskatchewan or NW Ontario. Orders are usually sent Mondays and Tuesdays.

**Shipping & Handling - Plants:** Mb. $25.00, NW On. $30.00, Sk. $40.00, Ab. $45.00, BC, On, Qc, & Maritimes $50.00. List alternate varieties if substitutes are acceptable. If large orders have higher shipping costs we will contact you.

**Shipping & Handling - Seed/Books:** Up to 30gm $2.50, To 100gm $5.50, To 1 kg $17.00

Plants are available in 4.5” pots or as well rooted plugs. Plugs come in 5 packs or trays of 70 plugs. There are 14 5 packs in a tray. One tray of plugs planted at 10”-12” spacing covers 50-70 sq.ft. Only 1 variety per 5 pack. Wildflowers & grasses may be mixed in trays. The plugs are great for planting a prairie meadow. We can recommend a suitable mix of varieties for you if desired.
